WE ARE THE THINKERS, DISRUPTORS AND MAKERS.
SEE WHO WE ARE.

WE ARE Morgan Stanley

Morgan Stanley Technology
2023 Summer Analyst Program (Hong Kong)

Leverage your coding, analytical or engineering skills at Morgan Stanley
Join our growing Technology team!

Our Technologists design market leading platforms and engineer solutions that move capital around the world. As a top-tier Investment Bank, clients choose Morgan Stanley due to the quality of our financial advice and the competitive stability, safety and speed of our in-house technology platforms. This close partnership between Technology and our business drives the Firm forward and creates real impact, enabling our clients to fund the next big start up, expand industries and develop communities. We are looking for **penultimate year students** to join our **10-week Summer Analyst Program** taking place in **June to August 2023**.

Our internships will allow you to:

- Use your **technical skills to transform the financial industry**, design and implement innovative solutions to our best-in-class products such as Automated Trading Platforms
- Develop **your career in an agile environment**, we nurture career Technologists by investing in **continued learning** and providing access to mobility opportunities across teams
- Work in **an innovative and global environment** where technologists solve complex challenges with team members from across the world and provides opportunity for **global mobility** after joining us full-time
- Potentially receive an offer to join our global Technology Analyst Program (TAP) after you graduate

What our past interns have to say:

The internship program and the full-time TAP program set me up for success at an early stage, building a strong foundation in software development, which was helpful in a lot of technical challenges I face in project delivery. Besides business domain knowledge, the program helped to build my network with Morgan Stanley Technologists around the world and understand how my technical skills makes an impact to the business. I am now the Regional Lead of Equity Derivatives Lifecycle Management team and a proud mentor of the juniors from TAP program.
– Fani, Vice President, Technology (Hong Kong)

Through the TAP program, I learnt a lot of useful technical skills that shaped my confidence and ability in tackling problems and formulating solutions. The program helped me to not only understand applications written in different coding languages, I was also able to identify my strengths and to focus on improving my skillset. The program is designed thoughtfully to act as a smooth bridge between your last day as a student and your first day as a Technology professional. Morgan Stanley puts emphasis on development and value our growth, and these are some things that matter to me.
– Pareen, Associate, Technology (Hong Kong)
